

## **Interspire Integration Document**

## Introduction

This guide will show you how to configure PayUmoney as your payment processor on Interspire for payments through Credit Card, Debit Card, Net banking and Saved Cards.

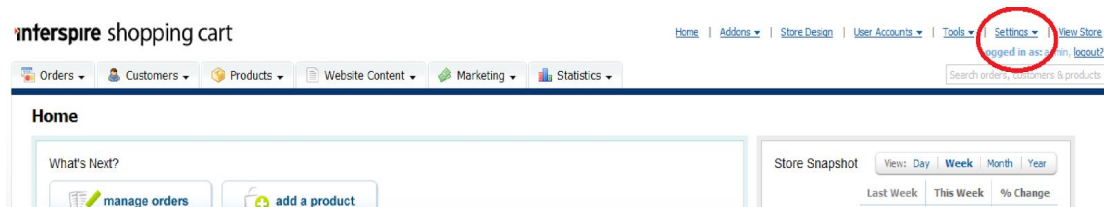

## Prerequisites

To Integrate PayUmoney payment gateway, you must:

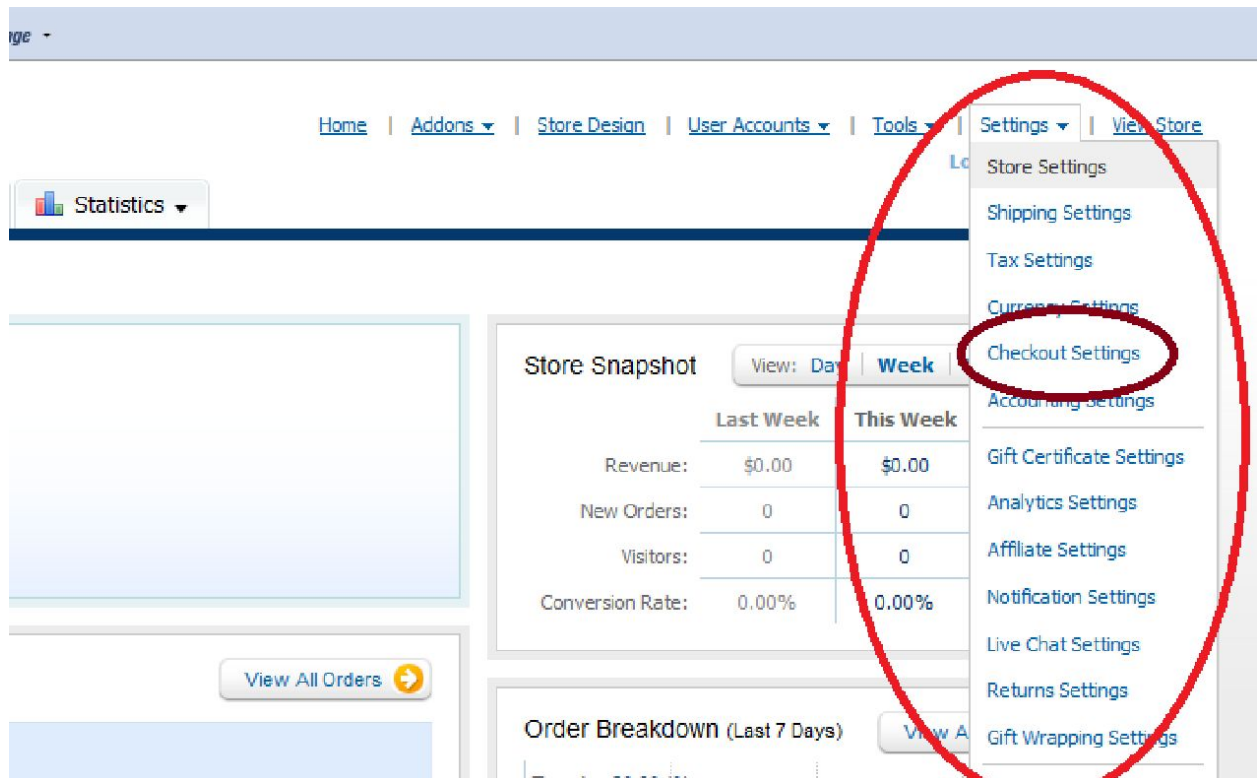

1. Have a merchant account with PayUmoney. If haven't already registered, please visit <https://www.payumoney.com/> and then register as a merchant.
2. Know your Salt & Key. These are available on the dashboard. If you already have a PayUmoney merchant account, please login at <https://www.payumoney.com/> and you will be able to retrieve your salt and key from the "Account details" tab.

## Steps to Integrate

- 1) Merge the interspire module of PayUmoney in your root directory.
- 2) Paste the PayUmoney folder in checkout folder under module folder  
**Folder Path: Site root\modules\checkout\payu**
- 3) Login to your admin panel and click on **Settings**.

- 4) In settings, select **Checkout Settings**

The screenshot displays the PayUmoney dashboard interface. At the top, there is a navigation bar with links: Home, Addons, Store Design, User Accounts, Tools, Settings, and View Store. The 'Settings' dropdown menu is open, showing a list of settings categories. A red circle highlights the 'Checkout Settings' option. The dashboard also features a 'Store Snapshot' section with a table comparing 'Last Week' and 'This Week' data for Revenue, New Orders, Visitors, and Conversion Rate. Below this is an 'Order Breakdown (Last 7 Days)' section. A 'View All Orders' button is visible in the bottom left area.

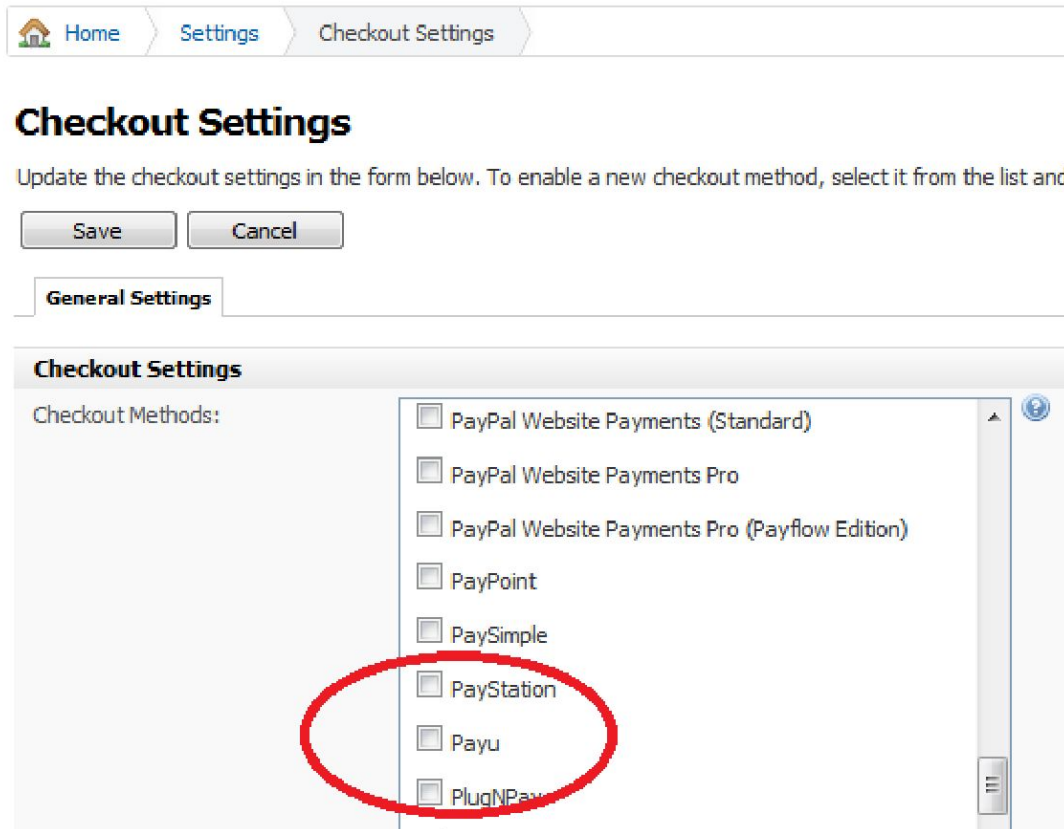

Store Snapshot

	Last Week	This Week
Revenue:	\$0.00	\$0.00
New Orders:	0	0
Visitors:	0	0
Conversion Rate:	0.00%	0.00%

Order Breakdown (Last 7 Days)

View All Orders

- 5) In checkout setting, select **PayU** and click **Save**

Home > Settings > Checkout Settings

## Checkout Settings

Update the checkout settings in the form below. To enable a new checkout method, select it from the list and

Save Cancel

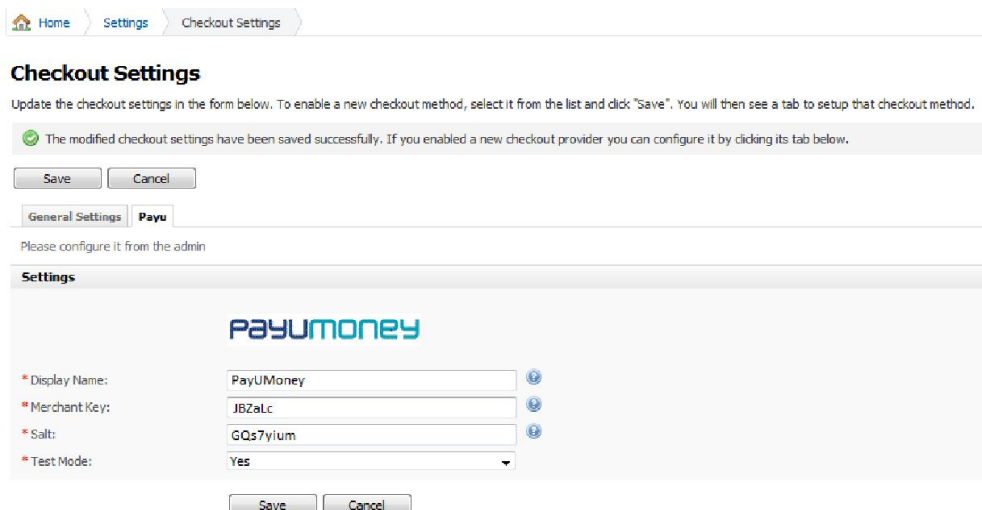

General Settings

### Checkout Settings

Checkout Methods:

- ☐ PayPal Website Payments (Standard)
- ☐ PayPal Website Payments Pro
- ☐ PayPal Website Payments Pro (Payflow Edition)
- ☐ PayPoint
- ☐ PaySimple
- ☐ PayStation
- ☐ Payu
- ☐ PlugNPay

- 6) Enter the **Key** and **salt**. The values of key and salt are available in your Payumoney merchant dashboard.

Home > Settings > Checkout Settings

## Checkout Settings

Update the checkout settings in the form below. To enable a new checkout method, select it from the list and click "Save". You will then see a tab to setup that checkout method.

 The modified checkout settings have been saved successfully. If you enabled a new checkout provider you can configure it by clicking its tab below.

Save Cancel

General Settings **Payu**

Please configure it from the admin

### Settings

**PAYUMONEY**

\* Display Name: PayUMoney

\* Merchant Key: JBZaLc

\* Salt: GQs7yIum

\* Test Mode: Yes

Save Cancel

- 7) Save the changes and you should now be able to make a transaction.

## Testing

If you want to test the payment first, you should obtain test values for "Merchant Key" and "Salt" (not production) and enable checkbox "Enable PayU Test mode)".

**Test MID:** 4934580

**Test Key:** *rjQUPktU*

**Test Salt:** *e5ilg1jwi8*

**Test Authorization Header:** *y8tNAC1Ar0Sd8xAHGjZ817UGto5jt37zLISX/NHK3ok=*

Below are the test card details for doing a test transaction in the testing mode. You may use the following card details for testing:

**Card Name:** Any Name

**Card Number:** 5123 4567 8901 2346 CVV: 123

**Expiry Date:** 12/2017

## Technical Assistance
